1. SITE IDENTIFICATION

1.1 Type B	1.2 Site code ITA030040	Back to top
----------------------	-----------------------------------	-----------------------------

1.3 Site name

Fondali di Taormina - Isola Bella

1.4 First Compilation date 1998-06	1.5 Update date 2013-10
--	-----------------------------------

1.6 Respondent:

Name/Organisation: Regione Siciliana Ass.to Territorio e Ambiente Servizio 4°
Address: Via Ugo La Malfa 169 - 90146 Palermo
Email:

Date site proposed as SCI:	1995-09
Date site confirmed as SCI:	No data
Date site designated as SAC:	No data
National legal reference of SAC designation:	No data

2. SITE LOCATION

2.1 Site-centre location [decimal degrees]:

[Back to top](#)

						Min	Max			Pop.	Con.	Iso.	Glo.
--	--	--	--	--	--	-----	-----	--	--	------	------	------	------

- **Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Species				Population in the site				Motivation							
Group	CODE	Scientific Name	S	NP	Size		Unit	Cat.	Species Annex		Other categories				
					Min	Max		C R V P	IV	V	A	B	C	D	
P		Cymodocea nodosa						R						X	
P		Cystoseira amentacea						C						X	
P		Cystoseira brachycarpa						C							X
I	1027	Lithophaga lithophaga						P	X						
P	1377	Phymatolithon calcareum						V		X					
I	1028	Pinna nobilis						P	X						
P		Posidonia oceanica						R						X	

- **Group:** A = Amphibians, B = Birds, F = Fish, Fu = Fungi, I = Invertebrates, L = Lichens, M = Mammals, P = Plants, R = Reptiles
- **CODE:** for Birds, Annex IV and V species the code as provided in the reference portal should be used in addition to the scientific name
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Unit:** i = individuals, p = pairs or other units according to the standard list of population units and codes in accordance with Article 12 and 17 reporting, (see [reference portal](#))
- **Cat.:** Abundance categories: C = common, R = rare, V = very rare, P = present
- **Motivation categories:** **IV, V:** Annex Species (Habitats Directive), **A:** National Red List data; **B:** Endemics; **C:** International Conventions; **D:** other reasons

4. SITE DESCRIPTION

4.1 General site character

[Back to top](#)

Habitat class	% Cover
N01	85.0
N05	15.0
Total Habitat Cover	100

Other Site Characteristics

I fondali di Taormina sono caratterizzati da una notevole varietà di morfologie. Infatti coesistono le falesie dell'isola Bella, di Capo Taormina e di Capo S. Andrea con le franate di grandi massi che da pochi metri digradano fino ai sessanta metri di profondità nella parte centrale dell'insenatura. Tra l'isola e i due promontori che delimitano la baia sono presenti due piccole spiagge di ghiaia mista a sabbie grossolane che proseguono sott'acqua con ampie spianate di sabbie fini. In un'area di pochi chilometri quadrati la tipologia della vegetazione marina bentonica si diversifica notevolmente a causa della diversità dei substrati. Infatti su substrato mobile è presente Posidonia oceanica che forma prati ben strutturati mentre su substrato roccioso la copertura vegetale è caratterizzata da popolamenti fotofili, in particolare sono ben rappresentati quelli a Cystoseira amentacea e Cystoseira brachycarpa e più in profondità da popolamenti a Dictyotaceae e Sphacelariacea

4.2 Quality and importance

I popolamenti vegetali di substrato duro dell'infralitorale, pur non rispecchiando la zonazione tipica del Mediterraneo per tutta la sua estensione, sono comunque ben strutturati e mantengono una elevata biodiversità. Significativa è la presenza di prati a Posidonia oceanica.

5. SITE PROTECTION STATUS (optional)

5.1 Designation types at national and regional level:

[Back to top](#)

Code	Cover [%]	Code	Cover [%]	Code	Cover [%]
IT05	3.0				

5.2 Relation of the described site with other sites:

designated at national or regional level:

Type code	Site name	Type	Cover [%]
IT05	RNO Isola Bella	+	3.0

6. SITE MANAGEMENT

6.2 Management Plan(s):

[Back to top](#)

An actual management plan does exist:

<input type="checkbox"/>	Yes
<input type="checkbox"/>	No, but in preparation
<input checked="" type="checkbox"/>	No

7. MAP OF THE SITES
